EDUCATION

University of Texas at Arlington

Expected May 2027

Bachelor of Science in Computer Science

- * Relevant Coursework: Computer Graphics, Machine Learning, Artificial Intelligence, Neural Networks and Deep Learning, Computer Networks, Computer Vision, Game Design and Development, Operating Systems
- * Extracurricular: 1st place HackSMU V, 1st place UNT NSBEHack 2022, South Central Regional Conference TAMU 2024, ACM, FSAE, IEEE, SASE, SHPE

EXPERIENCE

AI Operations and DevOps Engineer Intern

May 2026 - September 2026

Lockheed Martin

Fort Worth, TX

- * Developed and maintained an automated feedback pipeline for an AI-powered meeting-summary application, converting user-reported bugs and feature requests into structured GitLab issues and reducing manual engineering triage
- * Designed and delivered 10+ enterprise GenAI workshops to 300+ employees across 8+ teams on prompt engineering, AI coding assistants, RAG, and agentic workflows
- * Analyzed AI adoption metrics, usage trends, and employee feedback across 1,000+ employees, translating findings into training and enablement improvements that increased adoption by 20%.

Tech Lead

January 2024 - December 2024

HackUTA (ACM)

University of Texas at Arlington

- * Led a team of 6 developers in refactoring and deploying the HackUTA platform, supporting 900+ applications and 400+ attendee check-ins.
- * Integrated secure authentication, databases for participant tracking, and barcode-based verification systems during the event

Director

August 2025 - Present

ACM at UT Arlington

Arlington, TX

- * Led a 100+ member program and delivered 15+ DSA and full-stack workshops, increasing member engagement by 12%
- * Managed 10+ officers, mentored 50+ students, and organized 2 hackathons and 30+ events

Game Development Instructor

January 2023 - Present

Code Ninjas

Fort Worth, TX

- * Instructed workshops in physics, input handling, game loops, and state management to 100+ students with different skill levels
- * Designed structured lesson plans and debugging workflows across 200+ game modules, resolving logic errors, state desynchronization, and architecture issues to improve completion rates

PROJECTS

NASA Satellite Tracker | *JavaScript, Three.js, satellite.js, SGP4, CelesTrak*

- * Built a 3D satellite tracker rendering up to 8,000 spacecraft from live CelesTrak TLE and OMM data
- * Implemented SGP4 propagation, coordinate transformations, orbital trajectories, and a 48-hour history timeline
- * Engineered ground-station pass prediction for AOS/LOS, elevation, azimuth, range, and visibility conditions

MavGrades | *React.js, Next.js, JavaScript, Tailwind CSS, SQLite*

- * Built and deployed an academic analytics platform serving 10,000+ users and 500+ daily sessions as an alternative to the university's existing grade-analysis platform
- * Optimized SQLite query performance over a 50,000+ record dataset reducing average latency by 40%

WebGL Fluid Simulation | *JavaScript, WebGL, GLSL*

- * Built an interactive real-time fluid simulation in WebGL, sustaining 60+ FPS at 1080p with a 512x512 grid and user-driven forces
- * Implemented a GPU shader pipeline (advection, divergence, pressure solve) and reduced frame time 30% via texture ping-pong + batch rendering

Drowsiness Detector | *Python, OpenCV, MediaPipe FaceMesh, NumPy, pytsx3*

- * Built a real-time computer vision system detecting drowsiness triggering alerts on prolonged eye closure
- * Utilized Eye Aspect Ratio (EAR) computed from MediaPipe FaceMesh landmarks and head position

Android Inventory Tracker App | *Kotlin, Firebase, Android Studio*

- * Developed a real-time inventory tracker that replaces error-prone Excel workflows
- * Implemented QR checkout/return and automated due-date notifications, improving asset traceability and reducing reconciliation overhead

TECHNICAL SKILLS

- * **Programming Languages:** C++, C, C#, Java, Python, JavaScript, TypeScript, SQL, Lua, GLSL
- * **Frameworks, Libraries & Web Technologies:** HTML, CSS, Tailwind CSS, Next.js, React.js, Three.js, Node.js, Express, Jest, OpenGL, WebGL, SDL2, OpenCV, REST APIs
- * **Tools, Platforms & Databases:** Git, GitLab, GitLab CI/CD, Docker, Kubernetes, Helm, CMake, Postman, Linux, Windows, Unity, Blender, Oracle VirtualBox, PostgreSQL, MySQL, MongoDB, Firebase, Auth0, Vercel
