EDUCATION

University of Texas at Arlington

Expected May 2027

Bachelor of Science in Computer Science

- **Extracurricular:** 1st place HackSMU V, 1st place UNT NSBEHack 2022, South Central Regional Conference TAMU 2024
- **Student Organizations:** ACM, FSAE, IEEE, SASE, SHPE

Pilot Rise Flight School

September 2021

Student Pilot

- Trained in flight safety-critical operations under FAA Part 61 standards with discipline to procedures in zero-tolerance environments
- Applied aeronautical navigation, weather analysis, and risk assessment under live flight operational constraints

EXPERIENCE

AI Community Operations Intern

May 2026 – Present

Lockheed Martin

Fort Worth, TX

- Contributed to an applications team using Agile/Scrum and DevOps practices, leveraging AI coding tools to support software development, debugging, testing, documentation, and iterative delivery
- Design and deliver enterprise GenAI training on prompt engineering, AI coding assistants, RAG, and agentic workflows
- Tracked AI tool adoption metrics, engagement trends, and user feedback to improve enablement and operational efficiency

Game Development Instructor

January 2023 – Present

Code Ninjas

Fort Worth, TX

- Instructed workshops in physics, input handling, game loops, and state management to 100+ students with different skill levels
- Designed structured lesson plans and debugging workflows across 200+ game modules, resolving logic errors, state desynchronization, and architecture issues to improve completion rates

Director

August 2025 – January 2026

ACM at UT Arlington

Arlington, TX

- Led a 100+ member program and delivered 15+ DSA and full-stack workshops, increasing member engagement by 40%
- Managed 10+ educators, mentored 50+ students toward 25+ internships, and organized 5+ hackathons and speaker events

Tech Lead

January 2024 – December 2024

HackUTA (ACM)

University of Texas at Arlington

- Led development and refactoring of the HackUTA website, supporting 900+ applications and 400+ live event check-ins
- Integrated secure authentication, databases for participant tracking, and barcode-based verification systems during the event

PROJECTS

MavGrades | *React.js, Next.js, JavaScript, Tailwind CSS, SQLite*

- Developed a high-performance academic analytics platform as an alternative to our university's official platform
- Supported 10,000+ total users and 500+ daily active sessions
- Optimized SQLite query performance over a 50,000+ record dataset reducing average latency by 40%

WebGL Fluid Simulation | *JavaScript, WebGL, GLSL*

- Built an interactive real-time fluid simulation in WebGL, sustaining 60+ FPS at 1080p with a 512x512 grid and user-driven forces
- Implemented a GPU shader pipeline (advection, divergence, pressure solve) and reduced frame time 30% via texture ping-pong + batch rendering

Drowsiness Detector | Python, OpenCV, MediaPipe FaceMesh, NumPy, pytsx3

- Built a real-time computer vision system detecting drowsiness triggering alerts on prolonged eye closure
- Utilized Eye Aspect Ratio (EAR) computed from MediaPipe FaceMesh landmarks and head position

Satellite Tracker | JavaScript, Three.js, satellite.js, SGP4, CelesTrak

June 2026 – Present

- Built a 3D satellite tracker rendering up to 8,000 spacecraft from live CelesTrak TLE and OMM data
- Implemented SGP4 propagation, coordinate transformations, orbital trajectories, and a 48-hour history timeline
- Engineered ground-station pass prediction for AOS/LOS, elevation, azimuth, range, and visibility conditions

Android Inventory Tracker App | Kotlin, Firebase, Android Studio

- Developed a real-time inventory tracker that replaces error-prone Excel workflows
- Produced sequence diagrams and system flows to validate data consistency, error handling, and edge cases before implementation
- Implemented QR checkout/return and automated due-date notifications, improving asset traceability and reducing reconciliation overhead

TECHNICAL SKILLS

- **Programming Languages:** C++, C, C#, TypeScript, JavaScript, Python, SQL, Java, Lua
- **Frameworks & Libraries:** Next.js, React.js, Three.js, Node.js, Express, Jest, OpenGL, SDL2, MongoDB, OpenCV, REST API
- **Tools:** Unity, Git, Linux, Windows, Vercel, Auth0, Blender, MySQL, Oracle VirtualBox, Firebase
